

Data4Good Hackathon Vienna 2019

April 27-28, 2019

Define the Problem

Improve democracy by greater transparency into citizen complaints

Hackathon Objective:

- Prototype an analytical map of complaints to the city of Buenos Aires
- Data set of 900K citizen complains coming in through multiple channels
- Data static in CSV file. Highly structured but hard to visualize
- Mapping
 - Find functional representations of the data on geographic maps
 - Perform Geo-analytics on the data (w/ GeoPandas)
 - Generate maps as standalone web pages (w/ Folium)

The logo for Data4Good Hackathon Vienna 2019 is a stylized red heart shape composed of several overlapping geometric polygons in shades of red, pink, and green. The text "Data4Good Hackathon Vienna 2019" is written in white inside the heart.

Goals & Accomplishments

Data set of close to 900K citizen complaints coming in through multiple channels
Static data in highly structured CSV file. Hard to visualize.

Dataexploration

- Explore datasets
- Data augmentation

Mapping

- Find functional representations of the data on geographic maps
- Perform Geo-analytics on the data (w/ GeoPandas)
- Generate maps as standalone web pages (w/ Folium)

The logo for Data4Good Hackathon Vienna 2019 is a red heart shape composed of several overlapping geometric polygons in shades of red, pink, and green. The text "Data4Good Hackathon Vienna 2019" is written in white inside the heart.

Vienna 2019

Challenges Encountered

- Environmental issues -- set-up under Windows (but not only)
- Figuring out structure and milestones - all of the team came in “cold”
- Git branching and synchronization across the team members
- Understanding content of the data provided
- Understanding external data sets that might be relevant
- Geopandas -- Py library for processing of “near-ness”
- Folium -- Py visualization library for creating maps
- Determining objective(s) -- lots of brainstorming
- Implementation glitches; debugging

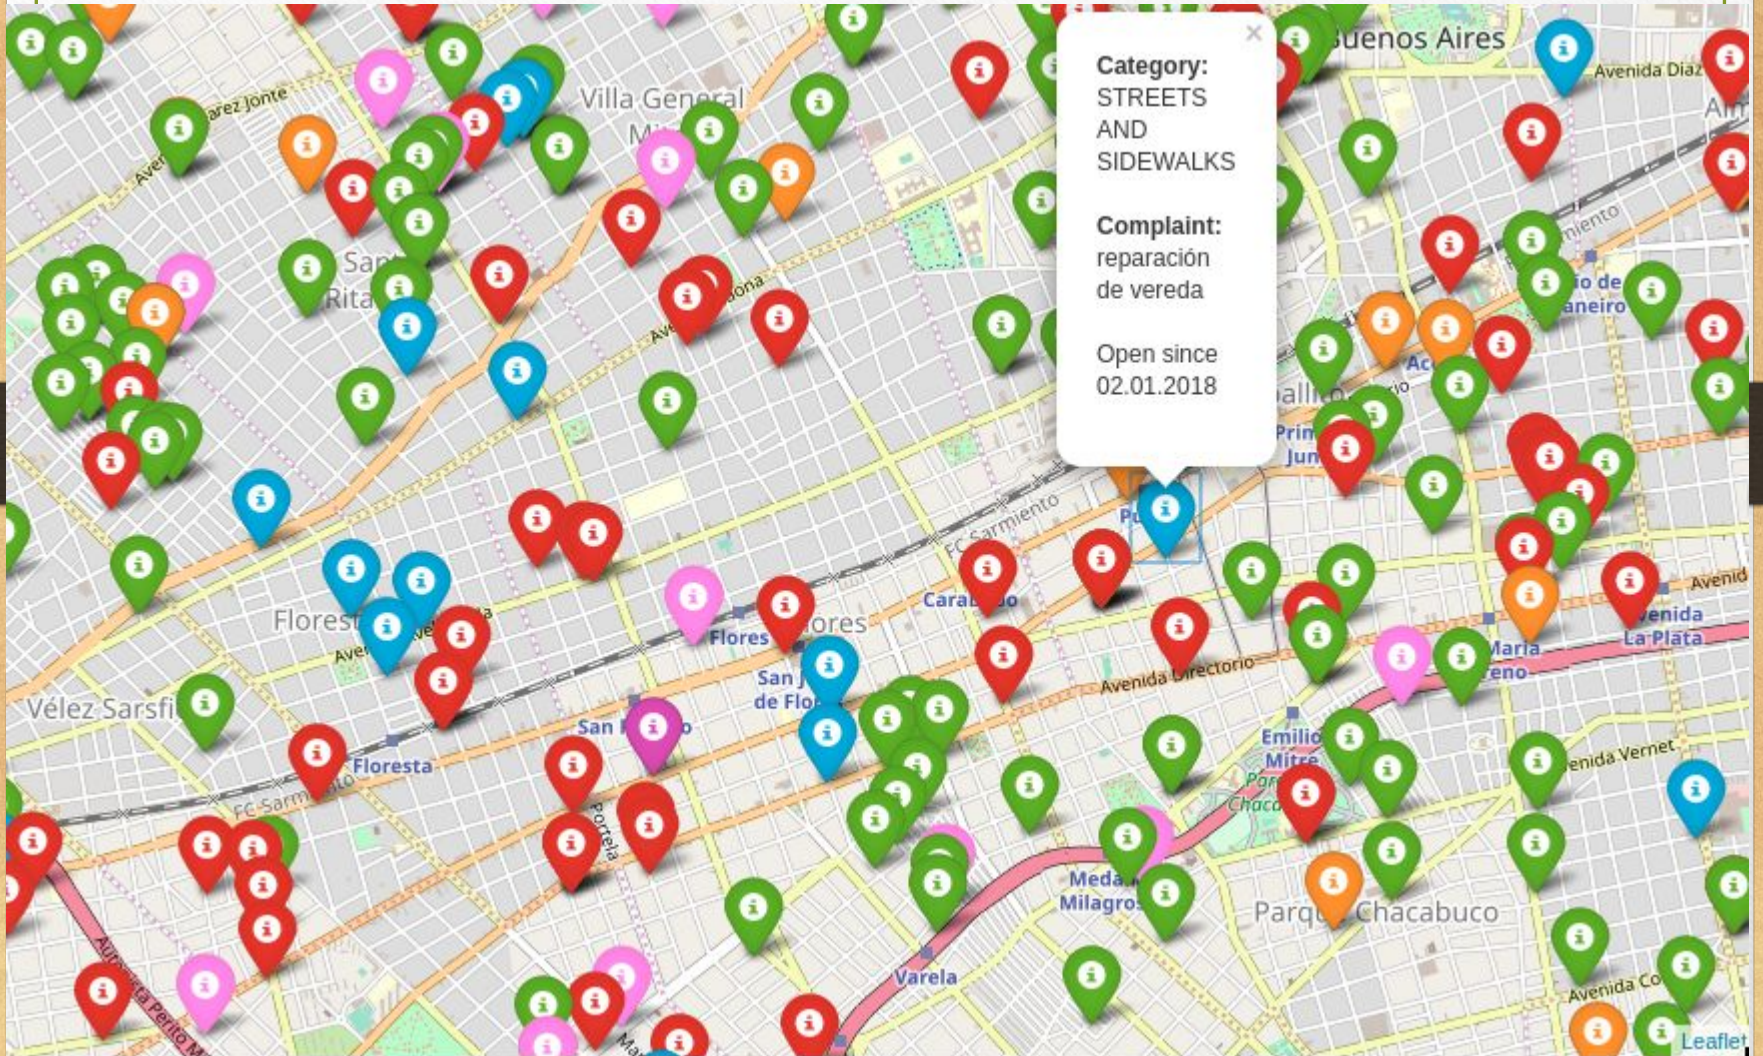

The logo for Data4Good Hackathon Vienna 2019 is located in the bottom right corner. It features a red shield-like shape with a white border, set against a background of green and purple geometric shapes. The text "Data4Good Hackathon Vienna 2019" is written in white inside the red shape.

Hackathon
Vienna 2019

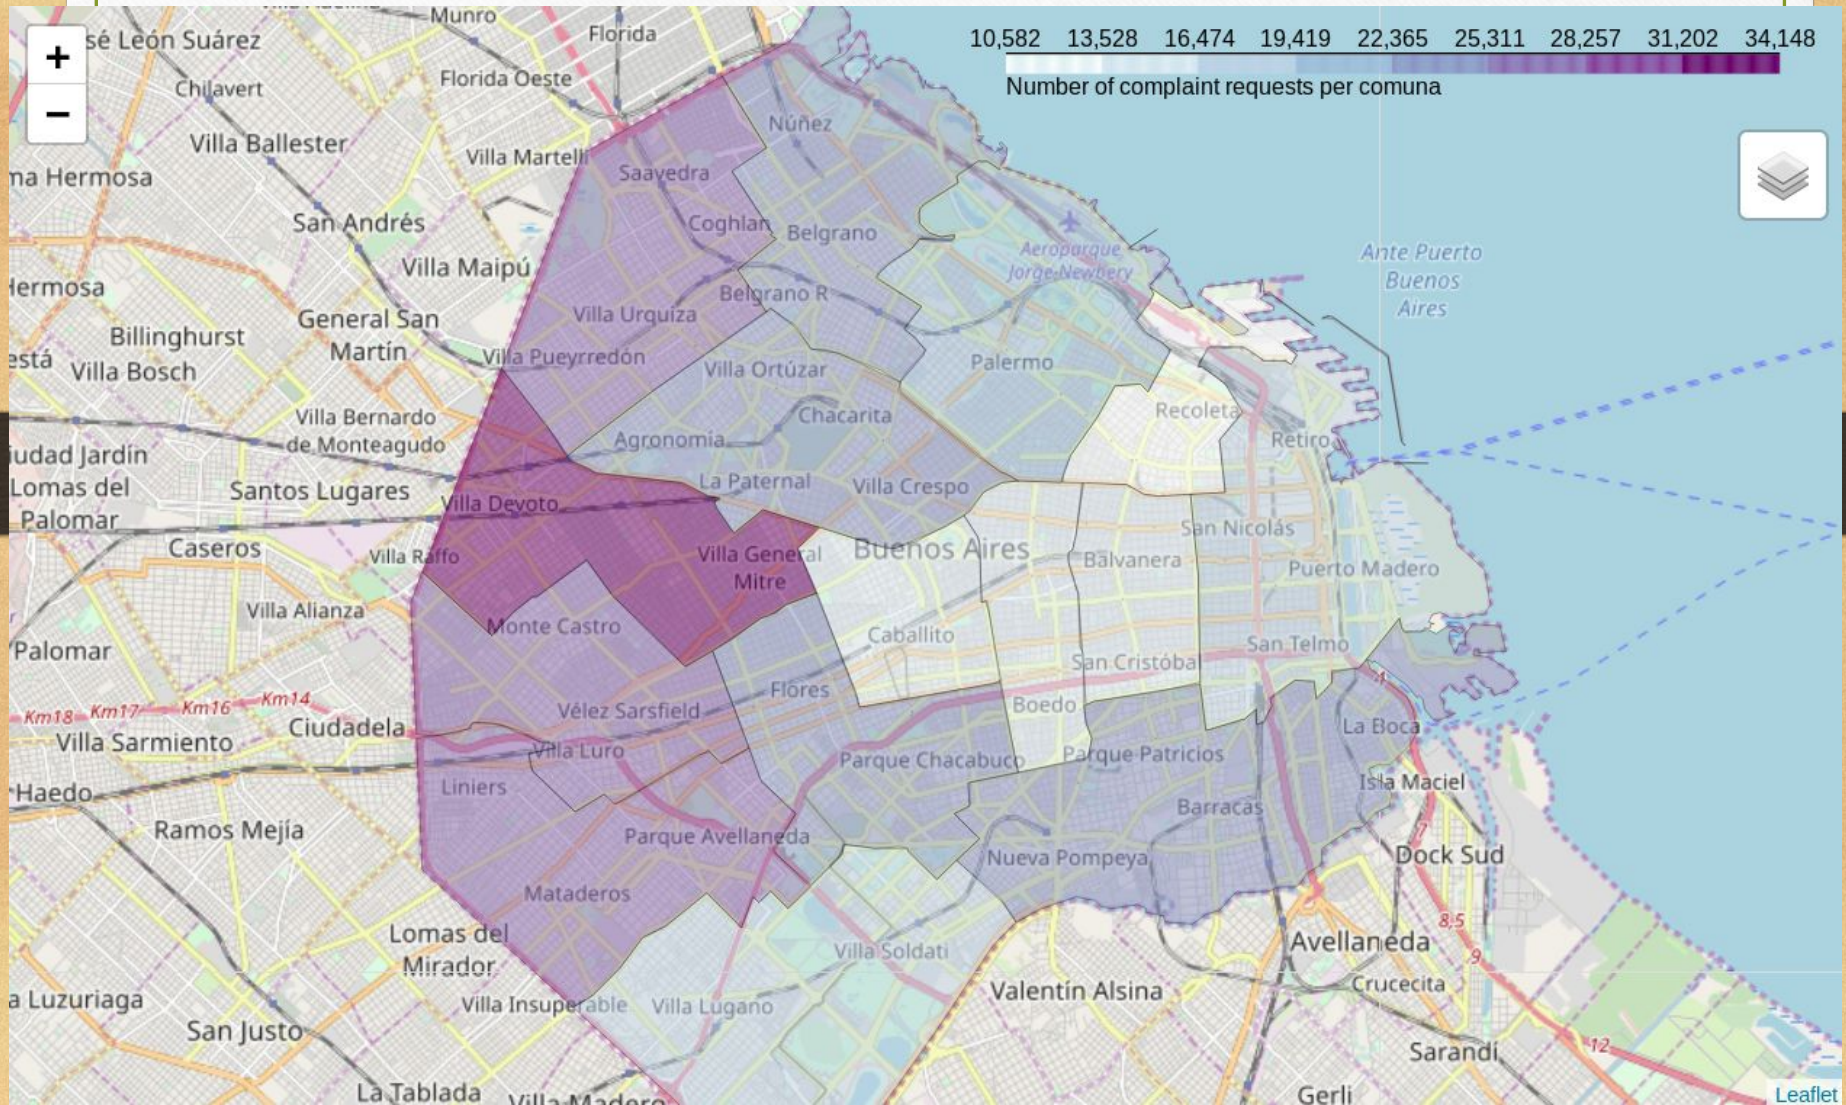

Location of longest open complaints

green - trash, pink - lighting, orange - trees&greenspaces

The darker the color, the more complaints

The Road Ahead

- Better visualization of different categories and subcategories of complaints
- More interactive time series analysis
- Better discrimination of the complaints in terms of their importance, quality of the data, and city official's response.
- Syntheses with other available open urban data sets

The logo for the Data4Good Hackathon Vienna 2019 is located in the bottom right corner. It features a red heart shape composed of several overlapping geometric polygons in shades of red, pink, and green. The text "Data4Good Hackathon Vienna 2019" is written in white inside the heart.
